

# Peroxtesmo KO

Test Paper for the determination of Peroxidase (in the food processing industries):  
only for professional user

## Pack content:

100 Test Papers, 15 × 15 mm

## Color reaction:

Peroxtesmo KO react with Peroxidase, to yield blue spots against a white background.

## Safety precautions:

Information regarding safety can be found on the box' label and in the safety data sheet.  
You can download the SDS from [www.mn-net.com/SDS](http://www.mn-net.com/SDS).

## Method of application:

Apply a drop of the test solution, such as vegetable juice, to the test paper or press the cut area of the plant to be tested firmly against the test paper. Any blue to bluish green coloration within two minutes is indicative of the presence of peroxidase.

Don't touch the test paper with the fingers.

## Disposal:

Information regarding disposal can be found in the safety data sheet. You can download the SDS from [www.mn-net.com/SDS](http://www.mn-net.com/SDS).

## Specificity:

Peroxtesmo KO is specific for the determination of peroxidase. The use of Peroxtesmo KO can only be considered a preliminary test.

The test paper will slowly (over a period of six months) change to brown, but as long as the bluish reaction colors are visible, it can still be used.
