

# QUANTOFIX® Copper

Pack content:

1 aluminum container with 100 test strips

Measuring range:

10–300 mg/L Cu<sup>+2+</sup>

Color gradation:

0 · 10 · 30 · 100 · 300 mg/L Cu<sup>+2+</sup>

General indications:

Remove only as many test strips as are required. Close the container immediately after removing a strip. Do not touch the test field.

Instructions for use:

1. Dip the test strip into the sample (pH 2–6) for 1 second.
2. Shake off excess liquid.
3. Wait 20 seconds.
4. Compare test field with the colour scale.

If copper ions are present, the test field turns red-violet.

Interferences:

Strongly acid solutions (pH < 2) have to be buffered to a pH value of 2–6 using solid sodium acetate. Concentrated copper solutions must be diluted to bring the copper content into the measuring range of the colour scale. The dilution factor must be taken into account when calculating the content.

Disposal:

Used test strips can be placed in the normal household waste.

Storage:

Avoid exposing the strips to sunlight and moisture. Keep container cool and dry (storage temperature not above +30 °C).

If correctly stored, the test strips may be used until the use-by-date printed on the packaging.

## Product data and ordering information

Type	Semi-quantitative test strips
Presentation	Tube of 100 test strips
Color reaction	white to red-violet
Gradation	0 · 10 · 30 · 100 · 300 mg/l Cu <sup>1+/2+</sup>
REF	91304
